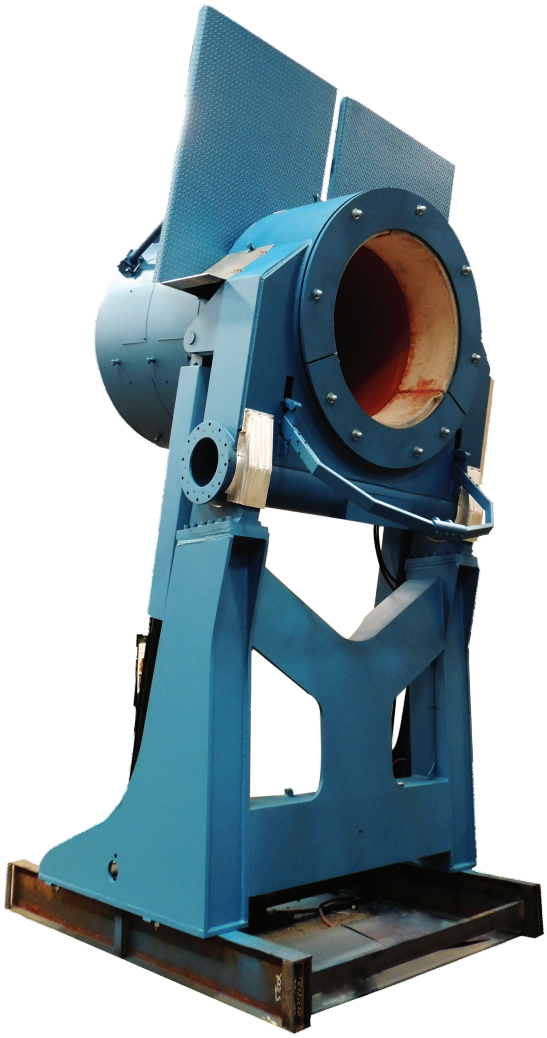
STEEL SHELL FURNACE

CORELESS METING FURNACES



ITC provides a wide range of steel shell coreless induction furnaces with matching power supplies.
Ranging from 1 000 to 20 000 lbs (450 kg to 9,000 kg)in capacity, our heavy-duty steel shell design provides economic and performance benefits.
By eliminating distortion, lining life is increased, and the optional hydraulic lift & swing lid gives thermal protection.

ADVANTAGES

- Suitable for melting, holding and pouring cast iron, steels, aluminum and most ferrous and non-ferrous metals
- High reliability
- Low energy consumption
- High operational safety
- Low melting loss
- Easy maintenance with long lining life

APPLICATIONS

- Horizontal and vertical continuous casting
- Alloying
- Sand casting
- Chip recycling
